Mikuni Corporation

News Release

Notice on Publication of Mikuni CSR Report 2021

We are pleased to announce that Mikuni Corporation (hereinafter referred to as "the Company") has published the English version of Mikuni CSR Report 2021. This edition contains all pages of the Japanese version of Mikuni CSR Report 2021, which was published on September 30, translated into English.

In 2020, we published our first CSR Report. In order to report our social responsibilities to our stakeholders, we have organized information on our relationships with local communities and society, as well as our governance, in addition to the contents of our previous "Environmental Report", into the "CSR Report".

In the 2021 edition of the CSR Report, we have disclosed the CO2 emissions of the Group's global production sites. Frequent suffering from natural disasters in every part of the world has raised concerns about climate change, and the governments of nations are discussing how they realize decarbonization or carbon neutrality. As a global business enterprise, we are very conscious that a company cannot be sustainable without addressing these global issues. We hope that the CSR Report will help you to find our consciousness behind our activities.

We will continue to seriously consider changes in the environment surrounding the company and various issues with a view to our own social responsibility. We would like to ask for your continued support.

Mikuni CSR Report 2021 (English version) is available on the official Mikuni website from today.
